Summary

Backend Engineer with **5+ years** of experience building high-load distributed systems in Go and Python at one of Kazakhstan's largest banks (3M+ clients). Took ownership of microservices end-to-end, mentored junior engineers, and drove cross-team architectural decisions in Agile/Scrum environments. Strong CS fundamentals with a focus on performance, reliability, and clean code. ICPC top 15, Eurasian Olympiad Silver Medalist.

Experience

Golang Developer (1y 9m), BCC Business (Bank CenterCredit) – Almaty, Kazakhstan Aug 2024 – present

- Reduced PDF processing memory by **78%** (72MB → 16MB) by implementing **gRPC bidirectional streaming** with zero-copy io.Pipe, serving document generation for **5,000+** business clients
- Migrated **3 deposit workflows** from BPMN to **Temporal**, which eliminated timeout-related crashes and cut call center support requests across **500+** daily deposit operations
- Built document exchange microservice from scratch with **10 API endpoints** and OpenAPI code generation, processing **200+** daily applications with OTP/RSA digital signing for **1,000+** business users
- Created Go microservice boilerplate adopted by **40+ projects across 5 teams**, covering auth, error handling, logging, and CI/CD for the Digital Banking Platform
- Replaced legacy **Java** certificate retrieval services with **Go**, reducing incidents and customer complaints by **40%**
- Mentored **2 junior engineers** through code reviews and pair programming, taking **ownership** of cross-team architectural decisions across the Digital Banking Platform

Software Engineer (3y 4m), Butterfly Effect – Astana, Kazakhstan Mar 2021 – July 2024

- Set up **Celery** and **RabbitMQ** for async task processing in the data collection pipeline, achieving **10x** throughput improvement over synchronous processing
- Reverse-engineered mobile applications using **BurpSuite**, ADB, and jadx decompilation, extracting **15+** undocumented API endpoints for data aggregation
- Boosted Elasticsearch query speed by **10-20%** through schema optimization and **GIN index** tuning across **50M+** documents

Achievements

Silver Medal, All Russian and Eurasian Olympiad in Informatics, top 5 in Central Asia (2018)

Top 15 out of 140+ teams, ICPC Regional Contest (2019)

Winner of KazHACKathon by TSARKA (2023)

Solved 1000+ algorithmic problems in C++ (Codeforces, LeetCode)

Completed Route256 by Ozon Tech — advanced Go course: concurrency, microservices, observability, SRE (2023)

Skills

Languages: Go, Python, SQL, C++

Databases: PostgreSQL, Elasticsearch, Redis, MongoDB

Infrastructure: Docker, Kubernetes, Linux, GitLab CI/CD, Load Balancers

Protocols & APIs: gRPC, REST, OpenAPI, WebSocket

Tools & Frameworks: Temporal, RabbitMQ, Keycloak, MinIO, Git

Methodologies: Agile, Scrum, Kanban

Education

Astana IT University, BSc in Software Engineering (3y 9m)

Sept 2019 – June 2023
